### Winemaking Report

2017 was a cool dry year with long winter nights. This ensured a longer ripening which adds to the minerality and finesse to this vintage. The drought caused the vine to push its roots deeper in search for water which will be an overall benefit to the future.

### Aging Potential

Enjoy right now or age up to 5 years. Bottled with an agglomerated cork, in order to ensure a flawless aging capacity. Ideal serving temperature between 10-12°C.

### Food Matches

This is the style we'd pair with simple, barely seasoned ingredients such as raw and lightly cooked shellfish like oysters and shell-on prawns, fresh crab and simply grilled fish such as sea bass.
